

Tesla Uses Panasonic, So Does Stark Drive

You can choose to charge the battery within the bike or remove the battery and charge it at work or at home.

We also designed the bike to hide this battery and its power distribution system neatly inside the frame making the bike look just like a normal bike.

It includes a locking mechanism that ensures no one can remove the battery without your uniquely produced key.

You can choose to charge the battery within the bike or remove it and charge it at work or at home.

We will offer both a quick charger as well as standard charger with Stark Drive (2 or 4 hours charge time respectively).
